## GLOSSARY

<b>BaFin</b>	The Federal Financial Supervisory Authority (BaFin) combines the business areas of the former federal supervisory offices for banking (bank supervision), for insurance (insurance supervision) as well as for securities trading (securities supervision/asset management) and continues to manage these. Amongst other things, BaFin shall supervise the correct and proper implementation of securities trading. In particular, it is responsible for protection against prohibited insider dealing.
<b>Capital Stock</b>	The capital which is stipulated in the joint stock company's Articles of Association. The Articles of Association also stipulate that the capital stock is to be divided up into x number of shares. The company issues shares which equate to the total of its capital stock.
<b>Cash flow</b>	An indicator which is used in particular in Anglo-Saxon countries for the purposes of shares or company analyses. It means the receipt of liquid assets within a specific accounting period and is basically made up of the addition of net income, depreciation, changes to long-term provisions, taxes on income and earnings. Conclusions can be drawn regarding the company's financing potential from the amount of cash flow and its identifiable trend during the course of the year. In terms of a share (Cash flow : Number of shares) or in terms of the share price (Share price : Cash flow per share), one obtains important indicators which, within the framework of the shares analysis, allows the comparison with a company in the same line of business at national and international level.
<b>Corporate Governance</b>	An instrument which is required by professional financial analysts and investors when performing modern company analysis. It can also redress current deficits in the traditional valuation processes particularly in respect of growth values. Competences, communications and control by the decision-making committees for companies quoted on the stock exchange are viewed and inspected. These supposed soft facts are of crucial importance when evaluating a company with increasingly non-material production processes.
<b>DAX</b>	The German Share Index (DAX) reflects the value trend of the 30 most important German shares. In addition to the market prices, the dividend payments are also included here. DAX began at the end of 1987 with a value of 1,000.
<b>DIMAX</b>	DIMAX is the German Real Estate Share Index which was first established by the Ellwanger & Geiger Bank in 1995. At present, the shares of 76 listed German companies are registered, all of which generate more than 75% of their income from the real estate business.
<b>Dividend</b>	Each shareholder is entitled to a share in the annual profit of his company which is paid out. This will correspond to the amount of his shareholding. This part of the profit is called a dividend.
<b>EBIT</b>	Earnings before interests and taxes. A figure which provides in concrete terms information on the company's success and its income situation. By leaving out of account taxes, net interest income and extraordinary income when considering the annual surplus, EBIT allows you to have a comparable statement on the actual earning power of the company, regardless of the equity ratio.
<b>EBITDA</b>	Earnings before interests, taxes, depreciation and amortization. A figure which provides in concrete terms information on the company's success and its income situation. With EBITDA, depreciation and amortization are also left out of account when considering the annual surplus. This takes into account the fact that companies which have a propensity to invest will show – as a result of high depreciation which reduces profit – a profit which is smaller than companies which have less of a propensity to invest.
<b>EPRA</b>	European Public Real Estate Association. Based in Amsterdam, the EPRA is an organization that represents the interests of the major European property management companies and supports the development and market presence of European public property companies. The well-known international index named after it, the EPRA index, tracks the performance of the largest European and North American listed property companies.
<b>EPS</b>	Earnings per share

<b>GEX</b>	The German Entrepreneurial Index. This is the index of small and medium-sized enterprises on the Deutsche Börse. The index contains all “owner-dominated” companies listed on the Prime Standard segment of the Frankfurt Stock Exchange who have gone public within the past ten years. “Owner-dominated” means a company where managing board members, members of the supervisory board or their families hold between 25% and 75% of voting rights.
<b>IFRS</b>	International Financial Reporting Standards (IFRS) is a world-wide accepted guideline for group accounting.
<b>Individual Share Certificate</b>	The individual share certificate does not show a par value. Its share in the capital stock depends solely on the number of shares issued. All individual share certificates embody the same share in the company.
<b>Issue</b>	Issue of securities by means of a public offer; usually happens as a result of a group of financial institutions acting as mediators (issuing syndicate).
<b>Issuer</b>	As a rule, issuers are companies or authorities who issue securities.
<b>Listing</b>	Listing/quoting a share on a stock exchange.
<b>Par Value</b>	A specific amount in Euro is printed on par value shares i.e. the par value. It shows what share the shareholder holds in the capital stock and thus in the total assets of his joint stock company. The smallest par value of a share is, in accordance with the Companies’ Act, 1 Euro. All higher par values are made out as a multiple of 1 Euro. This is distinct from the market price.
<b>Registered Share</b>	A share which is made out in the name of the shareholder. Contrary to the bearer share, when issuing registered shares the company is obliged to keep a shares register. The shareholders’ names and addresses are listed in this register. With regard to the company, a person is only deemed to be a shareholder if s/he is recorded in the register.
<b>SDAX</b>	Small Cap Index. The SDAX comprises the next 50 issues from the traditional (“Classic”) sectors within the Prime Standard Segment that are ranked below the MDAX.
<b>Share Buy Back</b>	A process whereby a joint stock company buys its own shares and thus allows capital to flow back to the shareholders. No rights are conceded to the company from these shares (voting right, dividend entitlement, subscription right etc.).
<b>Share index</b>	Share indexes group together the price or value trend of several shares. The shares included are weighted per index according to certain criteria. Price indexes (for example FAZ [Frankfurter Allgemeine Zeitung] share index) take into account only the price trend of the shares. Performance indexes (for example DAX) also take into account dividends and subscription rights in the event of capital increases. Performance indexes therefore cover the whole of the value trend of the shares contained in the index.
<b>Share Option Plans</b>	Joint stock companies set up option plans in order to grant employees and in particular executive personnel a remuneration which is dependent upon the share price instead of other bonuses. In the event of management decisions, this shall in particular contribute to a shareholder value orientation.
<b>Subscription Right</b>	The right of the shareholder to buy new (“young”) shares from his company in the event of a capital increase. The shareholders can waive their right to subscribe and they can sell the subscription rights to the stock exchange.
<b>XETRA</b>	The term XETRA stands for the electronic stock exchange trading system of Deutsche Börse AG (Exchange Electronic Trading System).
