#### Description of the location of the actual activities

The actual address of PATRIZIA Logistics Management Europe B.V. is Fred. Roeskestraat 111, 1076EE in Amsterdam.

### General accounting principles

#### Description of the accounting standards used to prepare the financial statements

The financial statements are drawn up in accordance with the provisions of Title 9, Book 2 of the Dutch Civil Code and the Dutch Accounting Standards, as published by the Dutch Accounting Standards Board ('Raad voor de Jaarverslaggeving').

Assets and liabilities are generally valued at historical cost, production cost or at fair value at the time of acquisition. If no specific valuation principle has been stated, valuation is at historical cost.

### Accounting principles

#### Policy of property, plant and equipment

Tangible fixed assets are valued at historical cost or production cost including directly attributable costs, less straight-line depreciation based on the expected future life and impairments.

#### Policy of receivables

Receivables are initially valued at the fair value of the consideration to be received, including transaction costs if material. Receivables are subsequently valued at the amortised cost price. If there is no premium or discount and there are no transaction costs, the amortised cost price equals the nominal value of the accounts receivable. Provisions for bad debts are deducted from the carrying amount of the receivable.

#### Policy of cash and cash equivalents

Cash at banks and in hand represent cash in hand, bank balances and deposits with terms of less than twelve months. Overdrafts at banks are recognised as part of debts to lending institutions under current liabilities.

Cash at banks and in hand is valued at nominal value.

#### Policy of current liabilities

On initial recognition current liabilities are recognised at fair value. After initial recognition current liabilities are recognised at the amortised cost price, being the amount received taking into account premiums or discounts and minus transaction costs. This is usually the nominal value.

#### Accounting principles for determining the result

The result is the difference between the realisable value of the goods/services provided and the costs and other charges during the year. The results on transactions are recognised in the year in which they are realised.

#### Policy of revenue recognition

Net turnover comprises the income from the supply of goods and services and realised income from construction contracts after deduction of discounts and such like and of taxes levied on the turnover.

#### Policy of income tax expense

Tax on the result is calculated based on the result before tax in the statement of income and expenses, taking account of the losses available for set-off from previous financial years and exempt profit components and after the addition of non-deductible costs. Due account is also taken of changes which occur in the deferred tax assets and deferred tax liabilities in respect of changes in the applicable tax rate.

### Balance sheet

#### Receivables

Other receivables	1.704.230	501.833
<b>Total of receivables</b>	<u>1.704.230</u>	<u>501.833</u>
